

## Open Frontiers vacancy details

Job Title	<b>C# .Net SQL Server Web Developers</b>
Vacancy Description	<b>We are looking for front/back-end developers with 3+ years experience, to help bring development in-house and support our rapid growth. We offer flexibility, a great working environment, and longer term opportunity to step up to senior roles. You will be able to demonstrate competence working on UI design, back-end coding and SQL server database integration. You will be adept with C# .Net, SQL Server, UI design, AJAX, XML, Visual Studio.Net 2008, Ajax, JavaScript &amp; JQuery. We are undertaking some exciting projects: * Using master pages, themes, skins and CSS, you will help us develop a multi-client white label ecommerce front end, using resource files for multi-lingual content. * Help us hook up latest generation touch-screen tills and peripherals with our web application to create an integrated web to ePOS capability. * Create an advanced reporting and data warehouse module with SQL Reporting Services, allowing users autonomy to build and manage their own KPIs. * Develop an expanding library of mobile applications on latest generation wireless multi-function mobile devices for on-the-move selling, check-in, membership enrolment and visitor feedback. As well as these you will assist with product/feature specifications, system testing, customer technical support, and meet with clients to discuss specific requirements and solutions.</b>
Vacancy Type	<b>Permanent post, Full-time</b>
Positions available	<b>Up to three</b>
Salary	<b>Competitive based on experience</b>
Start Date	<b>Immediate</b>
Location	<b>Ousden, nr Newmarket (relocating to Cambridge soon)</b>
Further Details	<b>A complete understanding of what we do can be gained by browsing our website - <a href="http://www.openfrontiers.co.uk">www.openfrontiers.co.uk</a></b>
Person Specification	<b>Any degree discipline. The successful applicants will be enthusiastic, diligent, creative and have a 'can-do' attitude. They will enjoy working in a young vibrant company and over time they will become key figures in the future development of Time Pursuit. You will ideally have a business/computing or IT specific degree. However candidates who have degrees in other disciplines are welcome to apply if they have a strong and applied knowledge of computer programming, gained through on-the-job experience elsewhere. Candidates will be able to show us how they have applied their development skills in real life commercial circumstances.</b>
Class of Degree	<b>Min 2.1</b>
Additional Languages	<b>Useful but not required</b>
